

3rd Transcultural Conference on Medicine, Psychiatry on European Countries

22.04.2022-24.04.2022 Gdynia/Poland

Over the past 30 years, several approaches and experiences for the recognition and care of mental health have been developed in Europe. Be it for physical, mental or social care, it would be very fruitful to compare our respective practices in the field of clinical research and training of healthcare professionals. The goal is essentially learning best practices in terms of care from each other in order to avoid stigma and cultural assignment of patients. Recent research as well as intervention models developed by international expert groups, organizations and service providers in Europe will be the special focus of this conference.

*Solmaz Golsabahi-Broclawski,
Artur Broclawski*

WORKSHOPS AND SYMPOSIA

This meeting will be used to introduce new ideas and/or important concepts and for discussions in order to explain particularly good examples of practice in the area or to demonstrate and to present new empirical data.

Main language: English

CALL FOR WORKSHOPS AND SYMPOSIA

The workshops aim to deepen a topic or a question in the common conversation. During a symposium, four short presentations à 20 minutes will be held, which are going to be discussed subsequently. Proposals for a workshop or symposium should consist of a working title, a brief abstract (approximately 500 words) and the name of the organizing people and their functions.

Language: English

Deadline for submission: 31 January 2021
